The Andrews Elite Spring Hockey Program has been in existence for 17 years. The Program is designed to give elite players the chance to compete at a high level and play with other high end players from their region or province. All teams are trained using the principles, concepts, strategies and practice plans of Andrews Hockey Growth Programs. Teams not only engage in on ice competition but train off the ice and attend classroom sessions to enhance learning. Our players are taught good solid values and the benefits of team play.
